HOPS je postao novi član Med-TSO

Udruženje mediteranskih operatora ima 20 članova iz 18 mediteranskih zemalja

16.04.2018. - 12:07
Zagreb
M.E.

U Bruxellesu 11.04. na Skupštini Udruženja mediteranskih operatora prijenosnih sustava (Med-TSO), HOPS je službeno postao jedan od članova udruženja koje okuplja operatore prijenosnih sustava iz 18 mediteranskih zemalja. Članstvom se očekuje aktivna suradnja u razmjeni stručnog znanja, iskustava, te sudjelovanja u zajedničkim projektima kako bi se tako poboljšala operativna transparentnost operatora prijenosnih sustava te olakšalo prihvaćanje infrastrukture operatora prijenosnih sustava općoj javnosti. Udruženje Med-TSO raspolaže sa 400.000 km prijenosnih vodova i 544.000 MW instalirane snage. Med-TSO radi već šest godina u okviru Mediteranskog projekta, pronalazeći i analizirajući potencijalne infrastrukturne projekte u sektoru električne energije na Mediteranu. Također, Med-TSO želi učvrstiti svoju poziciju kao platformu za multilateralnu suradnju, u smislu instrumenta za integraciju i razvoj operatora prijenosnih sustava na Mediteranu kroz razvoj interkonekcija i integracije OIE, objavio je HOPS.

HOPS has become a new member of Med-TSO

The Association of Mediterranean Operators has 20 members from 18 Mediterranean countries

In Brussels 11.04. at the Assembly of the Mediterranean Transmission System Operators Association (Med-TSO), HOPS has officially become one of the members of the association that brings together transmission system operators from 18 Mediterranean countries. Membership expects active co-operation in the exchange of expert knowledge, experience, and participation in joint projects in order to enhance the operational transparency of the transmission system operator and facilitate the acceptance of the infrastructure of the transmission system operator to the general public. The Med-TSO Association has 400,000 km of transmission lines and 544,000 MW of installed power. Med-TSO has been working for six years within the framework of the Mediterranean Project, finding and analyzing potential infrastructure projects in the electricity sector in the Mediterranean. Also, Med-TSO wants to strengthen its position as a platform for multilateral cooperation in terms of instrument for integration and development of transmission system operators in the Mediterranean through the development of interconnection and integration of the OIE, HOPS said.
