Introduction

This document present Med-TSO's country comments on the adequacy situation in their system during the past season winter outlook 2023/2024. The country comments do not reflect Med-TSO statements.

Egypt

Winter Outlook 2023-2024

No adequacy issues were experienced for the Winter 2023-2024.

Jordan

Winter Outlook 2023-2024

No adequacy issues were experienced for the Winter 2023-2024.

Lebanon

Winter Outlook 2023-2024

For this winter 2023/2024 season adequacy issues were experienced, this included lack of reserve, and reduced thermal margin and forced load shedding,

The main reason for this adequacy issues were Interconnection unavailability & shortage of primary resources (Fuel or Renewable)

Libya

Winter Outlook 2023-2024

No adequacy issues were experienced for the Winter 2023-2024 thanks to voluntary demand management (shifting load) to mitigate any potential risks to the system.

Morocco

Winter Outlook 2023-2024

No adequacy issues were experienced for the Winter 2023-2024.

Tunisia

Winter Outlook 2023-2024

No adequacy issues were experienced for the Winter 2023-2024.
